

# NRMA Insurance Virtual Car Crash

## Instructions:

1) Unzip the file and select either:

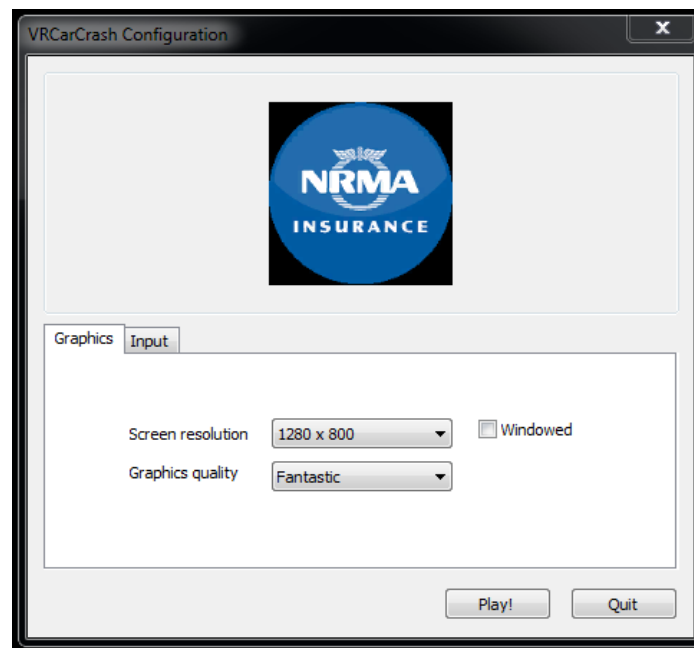

- VirtualCarCrash\_v50\_Win.exe (Windows) or
- VirtualCarCrash\_v50\_Mac.app (Mac)

2) Select the resolution and graphics quality that matches your computer's hardware.

The app was designed to run at 1280x800 which is the native resolution of the Oculus Rift DK1.

For the live event, we ran it at *Fantastic* quality on a Windows 7 machine with:

- Processor: Intel i7-4770
- Memory: 16 GB RAM
- Graphics: Geforce GTX 780
- Resolution: 1280x800

3) Press **Page Down (PgDn)** to start the simulation. It will loop back to the start once it finishes.

4) Press **Page Up (PgUp)** to reset the simulation.

5) To exit, press:

- **Alt-F4** (Windows) or
- **Cmd+Q** (Mac)
